

TOOL NEEDED

- + Power Drill
- + 2 3/8" Hole Saw
- + 1/8" Drill Bit

* Instructions are applicable for all doors whether they are solid, hollow or metal.

INSTRUCTION INSTRUCTIONS

Step 1. Stick the provided transparent template on the outside of door at the desired installation position.

Step 2. With a 2 3/8" hole saw (drill bit attached inside), starting on the exterior side of door, drill two 3/8"

holes until the drill bit protrudes through the interior side of door at least 1/8". Then go to the inside and finish drilling the hole out.

Step 3. Drill two 1/8" holes for the retainer ring locking pins approximately 1/8" in depth, as indicated on the template.

Step 4. Separate the locking ring by unscrewing from the main body.

Step 5. Insert main body into hole from the exterior side and place the pins in the holes.

Step 6. Secure snug and turn the locking ring until there is contact with the door surface.

Example only – NOT to Scale

WARRANTY
