

LATCH-GARD®

PROTECT
Against Break-ins

PREVENT
Expensive Repairs

Latch-Gard products are made in the U.S.A. using high quality materials. Our security plates are available in three colors and many different styles for your various applications.

The LG100/LG110 Series latch protectors are manufactured using heavy 12 gauge plate steel for maximum security.

All Latch-Gard models are available with Special Fasteners which allow for a quick and easy, flush inside installation.

Latch-Gard steel plates completely cover the latch area protecting the latch bolt while a jamb-pin prevents prying door open.

Easy installation requires drilling only three holes.

Reversible for right or left openings.

Item Description

For Mortise Locksets:

LG100Z	(3" x 11") Latch-Gard with jamb pin and hex nuts-zinc plated.
LG100Z/SF	(3" x 11") Latch-Gard with jamb pin and SF710 fasteners-zinc plated.
LG100Z/SFNP	(3" x 11") Latch-Gard no jamb pin and SF710 fasteners-zinc plated.
LG100D	(3" x 11") Latch-Gard with jamb pin and SF710 fasteners-duronodic.
LG100DNP	(3" x 11") Latch-Gard no jamb pin and SF710 fasteners-duronodic
LG100BB	(3" x 11") Latch-Gard with jamb pin and SF710 fasteners-bright brass plated.

Cut-out models for Cylindrical Locksets:

LG110Z	(3" x 11") Latch-Gard with jamb pin and hex nuts-zinc plated.
